

## Hackathon Event Report

Event Name: VIRTUAL CODE

Date: Mon Apr 21 2025

Venue: HACKEREARTH

Total Registrations: 3

Hackathon Type: Solo

### Introduction

The hackathon event provided an exciting opportunity for participants to showcase their coding and problem-solving skills. Teams and individuals competed to develop innovative solutions within a limited timeframe.

### Objectives

The primary goals of the hackathon were:

- Encourage innovation and creativity in technology.
- Provide a platform for networking and collaboration.
- Develop practical solutions to real-world problems.
- Enhance coding, teamwork, and problem-solving skills.

### Event Highlights

The event witnessed enthusiastic participation from students, developers, and tech enthusiasts. Key highlights include:

- Total Teams Participated: N/A
- Total Individual Participants: 3
- Keynote speech by industry experts.
- Hands-on workshops and mentorship sessions.
- Live product demonstrations and project pitches.

### Judging Criteria

The projects were evaluated based on the following parameters:

- Innovation and originality of the idea.
- Technical complexity and feasibility.
- Presentation and user experience.
- Impact and real-world applicability.

### Winners & Recognition

The top-performing teams and individuals were awarded for their outstanding contributions. Special recognitions were given for:

- Best Innovative Solution
- Most Technically Advanced Project

- Best Teamwork and Collaboration
- Audience Choice Award

### Conclusion

The hackathon was a resounding success, fostering innovation and collaboration among participants. The solutions developed during the event demonstrated great potential for real-world impact. We look forward to hosting more such events in the future.
